Account > Overview

ACCOUNT FEATURES

**Quick Start Guide**  
If you're new to Voxeo Evolution or voice applications, you'll definitely want to read our handy Quick Start Guide for instructions and development tips.

**Application Manager**  
The application manager contains settings for all of your voice applications, including URLs, mapped phone numbers, and outbound dialing tokens.

**Evolution Designer**  
Use Evolution Designer to build voice applications without any coding at all. Simply create a project, and let the web-based visual Evolution Designer handle the rest!

**Prophecy Log Search**  
Use our Prophecy Log Search tool to search your hosted call logs. In addition to searching for bugs, you can view call statistics and generate a wide variety of call reports.

**Application Debugger**

5. Click on Add Application, choose Prophecy 8.0 VoiceXML 2.1
6. Type a name for your application, and under “Start URL 1:” type the url to your xml file you create and uploaded in step 3.
